

MOBILE PLANT MECHANIC AT DELECCA'S: WHERE YOUR SKILLS SHAPE OUR SUCCESS!

Are you ready to drive your career forward with Delecca's, a leader in machinery for the construction, earthmoving, agricultural, and material handling sectors? We're looking for a skilled Mobile Plant Mechanic to join our dynamic team servicing rural Victoria and southern New South Wales. This is where your expertise in machinery and your passion for problem-solving come to life!

Does This Sound Like You?

- **Qualified and Experienced:** You're a qualified mechanic with a deep understanding of mobile plant machinery. Your hands-on experience makes you stand out in diagnosing, servicing, and repairing a wide range of equipment.
- **Safety-Conscious:** Safety is your top priority. You understand the importance of maintaining a safe working environment and adhere to safety standards diligently.
- **Team Player:** You thrive in a collaborative environment. Your ability to work well with others ensures that together, we achieve excellence.
- **Customer-Focused:** Your strong communication skills and customer service ethos mean you always put the customer first to solve their issues.
- **Eager Learner:** You're not just experienced; you're also keen to learn and grow, staying abreast of the latest industry trends and technologies.

In This Role, You Will:

- Perform detailed diagnostics and repairs on a wide variety of machines.
- Work both in the field and in our well-equipped workshop.
- Provide exceptional service to our valued customers.
- Be part of a supportive team that values your contribution.

Ready to Take the Next Step?

At Delecca's, we're not just offering a job; we're offering a career path filled with challenges and rewards. Download our full Position Description to learn more about the key accountabilities and responsibilities of this exciting role.

Take the leap and join a company that values your skills and offers a platform for growth. Apply now to be the driving force behind our success at Delecca's!

Delecca's is an equal opportunity employer.

POSITION DESCRIPTION

Mobile Plant Mechanic

Reporting to Service Coordinator

Hours per Week: 38

Purpose: To maintain and repair various types of mobile plant equipment used primarily in construction, agriculture and material handling.

Key Requirements

- High school diploma or equivalent. Formal technical training or certification in heavy equipment mechanics is preferred.
- Proven experience as a Mobile Plant Mechanic or in a similar role, 3 to 5 years preferred.
- Strong mechanical, electrical, and hydraulic knowledge related to mobile plant equipment.
- Proficiency in diagnosing and troubleshooting technical issues using diagnostic tools and manuals.
- Ability to read and interpret technical manuals, schematics, and drawings.
- Knowledge of safety regulations and practices in the heavy equipment industry.
- Excellent problem-solving skills and attention to detail.
- Physical stamina and ability to work in various weather conditions and challenging environments.
- Strong communication skills and ability to work as part of a team.

Key Accountabilities

Equipment Maintenance and Repairs:

- Perform regular inspections, maintenance, and repairs on mobile plant machinery and equipment, including excavators, loaders, forklifts, telehandlers, tractors, and other heavy machinery.
- Diagnose mechanical, electrical, and hydraulic issues and troubleshoot problems using technical manuals, diagnostic equipment, and hand tools.
- Repair or replace faulty components, parts, and systems to restore equipment to optimal working condition.
- Maintain detailed records of all inspection, maintenance and repair activities performed on each piece of equipment to support customer communication and invoicing.
- Provide timely and accurate reports on equipment status, maintenance history, and repair activities as required.
- Attend customer sites to perform equipment maintenance and repairs using company service vehicles throughout Regional Victoria.
- Ensure that all equipment meets safety standards and regulatory requirements.

Equipment Testing and Calibration:

- Conduct performance tests and calibration checks on equipment after repairs or maintenance to verify proper functioning.
- Use specialised diagnostic tools and equipment to identify and address performance issues.

Parts and Inventory Management:

- Identify required replacement parts and components and coordinate with the Parts team to ensure their timely availability.
- Maintain an organised inventory of spare parts and consumables required for equipment maintenance and repair in your work area and the broader workshop.

Teamwork and Communication:

- Collaborate with other mechanics, technicians, and team members to share knowledge and solve complex technical problems.
- Communicate effectively with supervisors and operators to understand equipment issues and provide feedback on repairs and maintenance.

Training and Development:

- Stay updated with advancements in mobile plant technology and industry best practices through training and self-development.
- Provide guidance and training to apprentices and junior mechanics to develop their skills and knowledge.
- Keep up-to-date with industry regulations and safety practices related to mobile plant machinery.

General

- Comply with occupational health and safety guidelines and any other related legislation that is applicable to the role and the working environment.
- Participate in training and development as required.
- Adhere to the company's code of conduct, policies and procedures.
- Other activities as directed by the Service Manager.
